

NOTIFICATION OF WORKS

Protected riding lanes on Arden Street, North Melbourne

Citywide, on behalf of City of Melbourne, are about to commence construction to install new protected riding lanes along the western section of Arden Street – having completed works along the eastern section in December 2024.

Where: Western section of Arden Street in both directions, between Dryburgh Street and Moonee Ponds Creek.

When: Starting in the week commencing Monday 17 February 2025 until end of June 2025, weather permitting.

Work Hours: 7am to 5pm Monday to Friday, with occasional overnight and weekend work as required.

Why: City of Melbourne is delivering a safer and better-connected riding network in North Melbourne.

What we are doing:

- The new riding lanes will be installed next to the footpath, protected from traffic by kerbs and parking bays.
- The bluestone pitcher channel will be reduced in width in some sections where it interferes with the riding lane.
- The road lanes will be reduced from two to one in both directions.
- New traffic islands with plants
- Green surface treatment to highlight the riding lane at certain locations.

How could this impact you?

While every effort will be made to minimise disruption, the following can be expected;

- Works will be planned in stages to minimise impacts to traffic, parking and nearby residents. There will be construction noise and dust during the work hours.

- Pedestrian, car, and bike access on Arden Street will be always maintained.
- Access to driveways will be maintained most of the time – properties will be notified if access is going to be impacted.
- **Road resurfacing works will be scheduled on weekends or overnight and require full road closure during works, a separate notice will be distributed.**
- Parking signs will be changed within 24 hours prior to construction works starting in each stage to ensure the area is clear for the works.
- The temporary parking signs will state 'authorised council contractors excepted' and the signs will look like this:

- **Please note that standard resident or other parking permits cannot be used in areas where this sign is installed.** Infringement notices may be issued after these signs are installed if a vehicle does not have a special reserved parking permit.

Site Map: A site map can be found at the back of this letter.
