

## STATEMENT OF SIGNIFICANCE

**Heritage Place:** Former Reserve  
Bank of Australia

**PS ref no:** HO1313

### What is significant?

The Former Reserve Bank of Australia, 56-64 Collins Street, a multi-storey office building constructed in 1964-66.

Elements that contribute to the significance of the place include (but are not limited to):

- The building's original external form, materials and detailing
- The building's high level of integrity to its original design.

Later alterations made to the street level facades are not significant.

### How it is significant?

The Former Reserve Bank of Australia at 56-64 Collins Street is of historical and representative significance to the City of Melbourne.

### Why it is significant?

Constructed in 1964-66 to a design with input from Prof. Brian Lewis, C. McGrouther, C. D. Osborne, R. M. Ure, and F. C. Crocker, the Former Reserve Bank of Australia has a clear association with the postwar building boom which transformed central Melbourne into a modern high-rise city. The design of these commercial buildings from the late 1950s to the mid-1970s – many of which were architect designed – was driven by the commercial demands and the prestige afforded by a dominant city presence (Criterion A).

The Former Reserve Bank of Australia is a fine and highly intact representative example of a Post-War Modernist office building. The building strongly reflects the style which was popular in the postwar period, particularly in central Melbourne. Constructed as a dominant 16-storey building on a corner site, the Former Reserve Bank of Australia building clearly demonstrates typical characteristics of a postwar curtain-wall structure. The cuboid form, with facades displaying a regular grid composed of horizontal bands of glazing with dark spandrels and contrasting vertical columns, as well as the variety of materials, including granite and marble cladding and aluminium window frames, demonstrate important aspects of the Post-War Modernist style (Criterion D).
