# SCHEDULE 2 TO THE ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as **ESO2**.

## EXCEPTIONAL TREES

## 1.0 Statement of environmental significance

22/02/2024
C379melb

The *City of Melbourne's Exceptional Tree Register 2019* identifies trees that are of exceptional significance. The trees have been identified for a variety of reasons, including their horticultural, aesthetic or historical value, because they are rare, old, or in a particular location or context; because they are an outstanding size or are a curious growth form, because they have outstanding habitat value or micro-climate services or because of their Aboriginal association or social, cultural or spiritual value. Many of these trees are also included in the National Trust of Australia (Victoria) Register of Significant Trees.

These trees contribute to the character and culture of local areas and collectively, to the valuable ecosystems of the City of Melbourne's Urban Forest.

## 2.0 Environmental objectives to be achieved

30/04/2021
C378melb

- To protect and preserve the exceptional trees as listed in the Table to this schedule, for their intrinsic environmental, ecological, habitat, historical, cultural, landscape, aesthetic and scientific values.
- To minimise the adverse effects of development and works on the condition and health of the exceptional trees as listed in the Table to this schedule.

## 3.0 Permit requirement

30/04/2021
C378melb

A permit is not required:

- To construct a building or construct or carry out works outside the Tree Protection Zone of any exceptional tree listed in the table to this schedule.
- To construct a fence outside the Tree Protection Zone of any exceptional tree listed in the table to this schedule.
- To construct bicycle pathways and trails outside the Tree Protection Zone of any exceptional tree listed in the table to this schedule.
- to subdivide land unless the alignment of the title intrudes on the Tree Protection Zone of any exceptional tree listed in the table to this schedule.
- to remove, destroy or lop any vegetation which is not listed in the table to this schedule.
- to remove, destroy or lop any dead vegetation.
- To prune any exceptional tree listed in the table to this schedule. Pruning is the trimming and removal of small twigs and minor branches to maintain the general shape or form of a tree. The pruning must be in accordance with the *Australian Standard – Pruning of Amenity Trees*, AS4373 (2007).

The Tree Protection Zone used to determine whether or not a permit is required under this clause is the area within the radius specified in the table to this schedule as measured from the centre of the trunk.

Any application must be accompanied by a report from a suitably qualified arborist, which identifies the reason and need for the proposed works, options for alternative treatments and any remedial or restorative action proposed.

## 4.0 Application requirements

22/02/2024
C379melb

None specified.

## 5.0 Decision guidelines

~~22/02/2024~~ ~~--/--/----~~
~~C379melb~~ Proposed C466melb

Before deciding on an application, the responsible authority must consider as appropriate:

- The impact of the proposal on the environmental, ecological, habitat, historical, cultural, landscape, aesthetic or scientific significance of the identified exceptional tree or group of trees.
- The impact of the proposal on the health, appearance and stability of the tree.
- The impact of the proposal within the tree protection zone of any identified exceptional tree including whether the tree protection zone (as assessed by a qualified arborist) is different in size or shape to the tree protection zone for that tree as defined in clause 3.0.
- Any relevant report provided by a suitably qualified arborist.
- The relevant identified values and statement of significance as in the Table to this schedule.
- Any report that identifies, describes, or deals with the tree including the City of Melbourne Exceptional Tree Register 2019 and the National Trust of Australia (Victoria) Register of Significant Trees in Victoria.
- Whether alternatives to tree removal including potential redesign or relocation of buildings and works, have been considered.
- Whether a long-term maintenance program is required for the tree, especially if it is subject to continuing works.
- The desirability of requiring fencing or any other protective barrier.
- Whether the planting of appropriate replacement tree(s) or vegetation is required.
- The findings of a report prepared by a suitably qualified professional on the impact of the tree on the structural integrity of a building included in a Heritage Overlay.

## Table to Schedule 2

| Property Address of Exceptional Tree | Tree Name (Botanical & Common) | Identified Value(s) | Tree Protection Zone Radius (m) | Exceptional Tree Register Tree Report Number: | Planning Scheme Map No. | Statement of Significance |
|---|---|---|---|---|---|---|
| Part 607-619<br>Bourke Street<br>MELBOURNE | Gleditsia sinensis,<br>Chinese Honey Locust | Historical (HO512) Value, Horticultural Value, Rare or Localised. | 9.48 | 1 | 8ESO | Believed to be the only specimen of this species in Victoria, the site was the location for the first brick and stone building in the Port Philip District (1830). This tree is on the National Trust's Register of significant trees of Victoria. |
| | | | | | | |
| 78<br>Carlton Street<br>CARLTON | Platanus Xacerifolia<br>Plane Tree | Outstanding Size, Particularly Old, Location or Context. | 15 | 3 | 5ESO | This is a large, old, fine specimen in a residential garden with a broad and spreading canopy in excellent condition, particularly in context with its built surrounds. |
| 2<br>Cathedral Place<br>EAST MELBOURNE | Ulmus glabra 'Lutescens'<br>Golden Elm | Aesthetic Value, Outstanding Size, Particularly Old, Location or Context. | 12.24 | 4 | 8ESO | This is an outstanding specimen that dominates the surrounding landscape.
